

# EASYPOLY CONTRACT 100-435 litres

Provide fuel to even the most remote locations with the EasyCube Contract range of diesel storage tanks. Legally allowed for on-road transport under ADR regulations, these moulded polyethylene tanks allow for safe and efficient fuel transport and refuelling. Designed to easily fit in the back of most trucks and vans, count on the EasyCube Contract to get your fuel where you need it. Only transported on the road legally under exemption scope of ADR1.1.3.1(c).

## FEATURES

### STACKABLE

Reduces storage space requirements with the ability to stack units up to 4-high when empty.

### DURABLE

Heavy-duty polyethylene tank provides reliable and safe storage and transportation of diesel.

### WEATHERPROOF LID

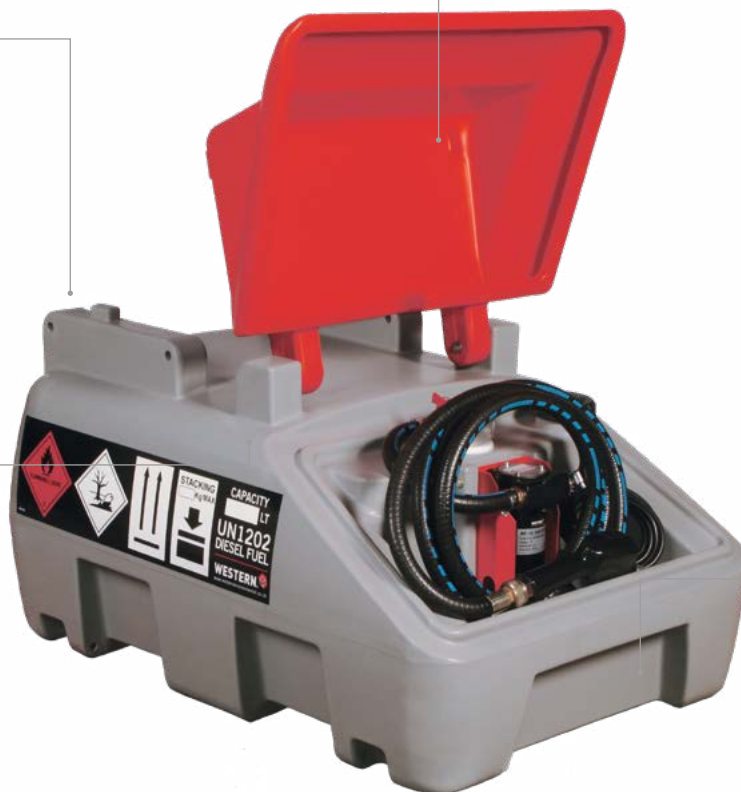

All equipment and ports are within the lid and are safe from the elements.

### MOULDED GRAB HANDLES

Light weight design and grab handles enable easy handling when empty.

### FORKLIFT POCKETS

Quick and easy manoeuvring when detached from trailer.

## IDEAL USES AND APPLICATIONS

### TRANSPORTABLE DESIGN

UN Approved IBC makes transporting fuel safe and hassle-free on any road or public highway.

### SHORT-TERM FUEL REQUIREMENT

Ideal for sites that require small amounts of fuel, EasyCube storage tanks offer refuelling versatility in a simplified, economic unit. This range is specifically designed for short-term projects, allowing quick and easy refuelling.

### FAST MOBILE REFUELLING

The EasyCube is a safe and reliable fuel storage solution to any location that requires quick refuelling of equipment. The forklift pockets in the base of the tank allow easy manoeuvrability to the tank.
