IMPORTANT WARNING NOTES

Failure to comply with any of the following will invalidate the pump warranty.

1. Assembly of this equipment and its associated pipe work and fittings should only be carried out by qualified fuel installation engineers.
2. The installation must conform to all relevant local authority regulations and standards.
3. This pump kit is only suitable for use with diesel & light oils.

PRODUCT DESCRIPTION

The pump kit is designed to fit into a 2" socket, for use on 205L drums & tanks up to 1.5m deep.

INSTALLATION AND PRIMING

1. Remove the pump unit and all accessories from the box and packaging.
2. Fit the 2" threaded part of the tank connector thread to the tank or drum.
3. Seal the threaded end of the blue suction hose into 1" tank connector thread on the inlet of the pump using a suitable thread sealing compound.
4. Seal one end of the delivery hose into the outlet elbow of the pump using a suitable thread sealing compound.
5. Seal the nozzle to the end of the delivery hose using a suitable thread sealing compound.
6. Mount the pump assembly onto the 2" tank connector, sliding the blue suction hose down through the connector and into the tank/drum first, and then tighten the Allen screws to secure in the desired position.
7. Mount the nozzle hanger in the desired location.

PUMP OPERATION

1. Insert nozzle into tank/container to be filled.
2. Start delivering fuel by moving the handle left/right in the slow, steady semi rotary motion.
3. Dispense required amount of fuel.
4. Stow nozzle and hose securely.

E.C. DECLARATION OF CONFORMITY

HYTEK
FUEL & LUBRICATION
EQUIPMENT
