FUEL FILTER With see-through Bowl FFL-01

- High Flow Fuel filter, complete with 10 micron fuel filter element
- For use with common fuels including regular and unleaded gasoline, diesel fuel, fuel oil, and related additives including methyl, ethyl and isopropyl alcohol, Bio Diesel blends upto 20%
- See-Through bowl allows for visual monitoring of fuel flow.
- Durable & lightweight design for easy installation on both mobile & stationary fuel tanks and on gasoline & diesel fuel pumps
- Ideal for use in agricultural & industrial applications
- Rust & weather resistant for years of service
- The 10 micron paper filter element filters even small particles of rust, scale, grit, dirt, sand & lint at a gravity flow of 19 litres / Minute (5 GPM) with only a 24" (600 mm) head. The filter element has 366 square inches of filtering surface which results in more particle retention, which means cleaner fuel, and fewer costly engine repairs
- Replacement filter elements available as spare
- Also available water block fuel filter element which separates water from fuel
