

## Internal Drum Store - IS12H

Designed for the safe and fully bunded indoor storage of horizontal 205ltr drums across three levels, the base of this model is manufactured from steel sheet with RHS cross members, pressed ribs and a heavy duty RHS end frame with corrugated panels. Above the fully seam welded sump, which fully complies with all the current UK regulations relating to sump capacities are three levels of drum racks (four horizontal drum per level) which are fitted across the back with safety "stop rails" to stop drums from being pushed through and falling off. The underside of the unit is fitted with base plinths to eliminate contact with the ground and reduce the risk of corrosion and prior to painting the unit is fully shot blasted to provide a clean and keyed surface. This model can hold 12 x 205ltr drums.

This unit will be delivered by an HGV, possibly articulated therefore please ensure that a vehicle of this type can access your premises before ordering and advise us accordingly.

You will require an appropriate size/capacity fork lift truck to offload this item from the delivery vehicle. Our standard delivery doesn't include any offloading.
