

DEFCUBE 2200 2,170 LITRES

The AdBlue storage solution from Western Global

The DEFCUBE 2200 is a transportable, environmentally secure, double-walled diesel exhaust fluid storage tank, that offers extended run time on stage IV/V diesel generators and other non-road mobile machinery. Ideal for both hot and cold climates, the DEFCUBE 2200 is the ideal solution for the temporary power industry's auxiliary DEF dispensing and replenishment needs.

*Available for delivery from April 2024.

FEATURES

STACKABLE DESIGN

Stackable design (3 high empty). Will stack on WG 30TCG diesel tank.

TRANSPORTABLE

Transportable full design.

STAINLESS STEEL

Stainless steel fitting plate that is customisable by end user depending on fittings required.

LIFTABLE FULL

Tank certified for top lift by 3rd party.

LOCKABLE EQUIPMENT CABINET

Secure lockable compartment for pumps & accessories.

COMPATIBILITY

Compatible with Stage V gen-sets with onboard lift pump from JCB, Generac, etc.

RENTAL READY

Robust 'rental ready' design with outer containment tank.

REMOVABLE INNER TANK

Removable inner polyethylene tank (ideal for storing DEF).

FOUR WAY FORKLIFT POCKETS

Forklift pockets and lifting lugs for ease of transport.

STANDARD FIT

Standard fit out includes fill cap, breather vent, pump feed and contents gauge.

IDEAL USES AND APPLICATIONS

GENERATORS AND AUXILIARY EQUIPMENT

The DEFCUBE 2200 can be easily connected to generators to supply DEF in the same way auxiliary diesel tanks are connected to a generator unit.

SHORT TERM DEF REQUIREMENT

The DEFCUBE 2200 is the ideal solution for short term, onsite DEF storage. Due to its mobile design, the DEFCUBE 2200 can transport DEF to any site - reaching even the most difficult locations.

MODELS AND CAPABILITIES

SPECIFICATIONS	22DEF
Capacity	2,170 L
Dimensions (L x W x H)	2,296 x 1,546 x 1,323 mm
Weight (Empty)	790 Kg
Optional pump	240V, 12V and Handpump options
